Toe Grounder NS-9301

Foot grounders are a good alternative to wrist straps when personnel can't be tied to a workbench. Workers who move around in the work area and who need to be grounded cannot wear a wrist strap that grounds them to a workbench with a coil cord. Foot grounders function exactly the same way as wrist straps by providing a ground path from the moisture layer on the wearer's skin through the foot grounder to the grounded floor surface. We recommend that foot grounders be worn on both feet to ensure that one foot is always in contact with the floor or floor mat at all times. It is important that personnel are instructed in the proper use and maintenance of foot grounders.

Standards

Meets the requirements of ANSI/ESD S-20.20, EIA 625, MIL-STD-1686, and MIL-HDBK-263.

Specifications

Constructions:

- * Stretch adjustable elastic band for comfort.
- * 1mm conductive rubber.
- * 1.6mm two layers anti-slip conductive rubber.

Resistivity:

- * Sole: 10e4 - 10e6 Ohm / Sq.
- * Grounding: 10e6 Ohm +/- 5%

Color:

- * Black
